14 SEMINARS AND 20 PRESENTATIONS

It is my honor to once again welcome everyone interested in attending the 5th International Congress on Regressive Therapy and the 6th Annual Meeting of the Spanish Association of Regressive Therapy (AETR).

This year we have a great novelty: we are leaving the province of Málaga for the first time and holding the Congress at the Los Baños de Alicún Spa (Granada), a magical and charming place in the middle of a desert.

In 2019, fifteen therapists initially trained at the Atma Center in Cártama (Málaga, Spain) decided to create the AETR and open ourselves to other ways of understanding our discipline, while always ensuring the professionalism of these other orientations. Currently, we have more than 140 members from countries as diverse as Argentina, the Czech Republic, Chile, Peru, Mexico, El Salvador, the United States, Italy, the Netherlands, Germany, Russia, Morocco, and Spain.

In 2025, eight schools will be accredited: Dr. José Luis Cabouli (Argentina-Spain), Psychologists Marcelo Beloqui (Argentina), Carlos González Delgado (Spain) and Nacho Romón (Spain), Professor Pepi Cáceres Gómez (Spain), Graduates Gabriela Cynthia Legoratti (Argentina) and Marcela Alejandra Pazos (Argentina) and Social Psychologist Jorge Luis Micheli (Argentina).

The renewed line-up of speakers and trainers for this year is as follows:

14 Seminars:

Dr. José Luis Cabouli (Argentina), Psy. Hans TenDam (Holland), Lic. Marion Boon (Holland), Lic. Trisha Caetano (USA), Dr. Viviana Zenteno (Chile), Dr. Pavel Gyngazov (Russia), Lic. Timm Christophel (Germany), Psy. Maria Angelina Pereira (Portugal), Dr. Vítor Rodrigues (Portugal), Lic. Athanasios Komianos (Greece), Psy. Martin Roesch (Germany), Psy. Victor Chirea (Romania), Dr. Marina Bilobram (Russia), Psy. Carlos González (Spain)

20 Presentations:

Dr. Linda Backman (USA), Lic. Emilio Carrillo (Spain), Lic. Willemijn Luyendijk (Netherlands), Psi. Claudia De Vincenzi (Argentina), Lic. Foster Perry (USA), Psi. Nacho Romón (Spain), Psi. Liliana Hollmann (Argentina), Ter. Marcela Pazos (Argentina), Ter. Alberto Boarini (Brazil), Lic. Gabriela Legoratti (Argentina), Psi. Leopoldo Ceballos (Spain), Psi. Sonia Tapiador (Spain), Psi. Avelino Martínez (Spain), Psi. Chelo Rodríguez (Spain), Lic. Beatriz Maetz (Spain), Ter. Gina Rodríguez (Spain), Lic. Claudia Cuervo (Spain), Psi. Nataly Orellana (Chile), Psi. Maithe Pardo Vico (Spain), Lic. María Rosa Martínez Fernández (Spain).

As a result of the international collaboration between the Spanish Association of Regressive Therapy (AETR), the Chilean Association of Past Life Therapists (ACHTEVIP), the Argentine Association of Past Life Therapy (AATVP) and EARTH (Earth Association for Regression Therapy), the Second International Advanced Training Course in Regressive Therapy has been organized during 2024, taught by the following group of professors:

Hans TenDam (Netherlands) , Timm Christophel (Germany), Nacho Romón (Spain), Bibiana Bistrich (Italy) , Marcelo Beloqui (Argentina), Marion Boon (Netherlands), Carlos González (Spain), Martin Roesch (Germany), Claudia De Vincenziv (Argentina) and Pavel Gyzonga (Argentina).

The following Working Groups are operating at AETR:

Research Group
Social Aid Group
Group for the Study of Ancestral Traditions (Shamanism),
New Therapists Support Group
Bulletin Group
Group of Translators and Interpreters
Group of Cases of Interest
Session Exchange Group.

- **The following Committees also operate:**
- **Approval of Schools, Member Needs, and Book Publishing.**
- **AETR has published the following books:**

"The Unveiled Soul" (2022),
"Regressive Therapy and Lost Souls" (2023),
"Regressive Therapy and Non-Human Consciousness" (2024)
"Regressive Therapy, Gestation and Birth" (2025)
"Regressive Therapy and Space Between Lives" (2025)
"Child Regressive Therapy" (2025)
"Regressive Therapy and Family Constellations" (2025)

This Congress contributes to the development of Human Consciousness, of therapy itself, and of its therapists. In fact, it's a double Congress. On the one hand, there are the theoretical presentations (which remain accessible through a voluntary donation) and, on the other, we have the great innovation of the Theoretical and Practical Seminars (which will not be free, but will have an exceptional price considering the quality of their instructors).

We ask you to help us by sharing this with your contacts. Thanks to your participation and financial contribution, AETR will be able to continue its great work for the community.

Thanks in advance and blessings to all.

Carlos González Delgado.
President of the AETR.

Welcome

of the President

4:00 PM - 6:50 PM TIMM CHIRSTOPHEL. Seminar: "Healing the Inner Children of Past Life Personalities: Unlocking Deeper Understanding and Karmic Transformation."

Self-Knowledge: total constitution of the human being and chain of lives.

Presentation: Wednesday 28 May, 16:00 - 16:50h.

1. The deep meaning of "Know thyself": "Essence" and "appearance" or "Being" and "existence" in the human experience.
2. The septenary constitution of the human being as a perfect conjunction of the imperishable (the "Driver") and the perishable (the "car", in which the former incarnates to experience the human experience).
3. Passenger souls: the experience throughout a chain of lives.
4. The recollection of past lives: the "great forgetting", reminiscence and gradual memory in step with conscious requirements and spiritual evolution.

PRE RECORDED

Emilio Carrillo, PhD in Economics and writer (92 published books), has long focused his life on spirituality and the expansion of personal and collective consciousness, areas in which he has shared more than a thousand conferences, workshops and meetings both online and in person in numerous countries.

He runs "The Academy of Consciousness" and the "Consciousness and Dystopian Society" research project. His blog, "Heaven on Earth," has more than ten million visitors.

Vedic Psychology and Regressive Therapy.

Presentation: Wednesday, May 28, 17:00-17:50h.

The objective of this talk is to present the approach and relationship between Vedic Psychology and Regressive Therapy as disciplines that emphasize the importance of self-knowledge and exploration of the inner self, using in practice to achieve a state of balance and deep understanding when healing traumas and emotional blockages. Both adopt a holistic approach to healing, seeing the individual as an "integrated whole" that includes the physical body, mind, emotions and spirit.

Vedic Psychology is a broader discipline, it includes multiple and diverse techniques such as: Yoga, meditation, mantras, Ayurvedic massage, pranayama, etc. All these practices are based on the teachings of the Vedas (sacred texts of India) seeking as a goal self-realization and the connection between the human and the Divine.

Regressive Therapy, by working with the idea of past lives and the evolution of the soul through multiple existences, seeks a deep understanding of emotional healing in the person, thus improving the purpose and mission of the present life. Taking into account this approach within Vedic Psychology, Regressive Therapy could be defined as a therapeutic healing technique or "Psychotherapy of the soul" that emphasizes seeking deep healing and personal transformation by accessing different levels of being and healing multiple states of consciousness in the present and past. Therefore, it is important to make known the relationship and these two approaches as complementary since they are integrative when proposing an emotional-spiritual dimension of the Being in the evolution of human consciousness.

DURATION: 50 min.

REGRESSIVE THERAPY AND MINDFULNESS: CONSCIOUS THERAPISTS.

Presentation: Wednesday, 28 May, 18:00 - 18:50h.

Therapists with a humanistic approach gave all the attention to the client and to the client's awareness of his or her problem and the way in which he or she interpreted it. Many therapists err on the side of anticipation, making judgments about the client's illness and this leads to incomplete therapies. On other occasions, therapists with excessive empathy suffer a significant deterioration of their own identity, they are overcome by the desire to solve the problems of others, leaving their own problems aside.

Roger spoke of honesty to explain the success of therapies when clients felt understood and not judged and therapists accepted the client's situation knowing where the limits are. Mindfulness helps you to be aware and differentiate your own feelings from those of others, to accept the client's situation with compassion and non-judgment, and can be very useful in helping you to be calm, relaxed and present before and during the session.

This will help the client to also relax and open to the process, thus creating a safe space in which sensitive topics can be explored as this way the client does not perceive stress or judgment.

MODALITY: On line - Pre-Recorded

DURATION: 50 min

Graduate in Psychology and Expert in Emotional Intelligence.

Member of the "Psychology and Mindfulness" Working Group of the Official College of Psychologists of Western Andalusia COPAO.

Member of the board of directors of the Spanish Association of Psychologists Specialized in Mindfulness APEMIND.

Certified Psychotherapist in Regressive Therapy and member of the board of directors of the Spanish Regressive Therapy Association AETR.

Organizer and Speaker of Courses and Workshops on Mindfulness applied to psychology.

Member of the UNED Round Table and Congresses: BIDIRECTIONAL CONTRIBUTIONS BETWEEN MINDFULNESS AND PSYCHOLOGY.

"Soul Connection, Why can we heal others? A scientific and psychological explanation."

Presentation: Wednesday, May 28 19:00-19:50.

The presentation "Soul Connection, why we can heal others. A scientific and psychological explanation." focuses on the emotional and psychological relationship between parents and children, explaining how this connection can be used as a healing tool through regressive therapy.

Psychology plays a central role in this process, and the TVP technique facilitates the understanding of unconscious emotions, traumas and patterns that influence life.

In DVT, parents act as mediators, channeling their children's experiences, often not verbalized or consciously remembered. Through this process, the exploration of repressed emotions is facilitated, allowing parents to better understand the origin of their children's emotional problems or behaviors.

So this presentation explores how TVP, psychology, attachment theory, empathy and neuroplasticity, especially exploring the brain connections that are activated in contributing to emotional healing and improving the relationship between souls.

Child Abuse: Prevention, Intervention, Psychoprophylaxis and Analysis of Clinical Cases.

Presentation: Wednesday, May 30 20:00 - 20:50.

Meeting Room 1

Childhood sexual abuse is a deeply traumatic experience that can cause an emotional and psychological disconnection in the victim, often referred to as a "soul loss." This loss is not literal, but refers to the sense of emptiness, fragmentation, and inner disconnection that many people experience following severe trauma. It is essential to address these wounds through a therapeutic process that allows for healing and reconnection with the inner self, facilitating the recovery of emotional and spiritual well-being.

MODALITY: On line

DURATION: 50 min

Claudia De Vincenzi has a degree in Clinical Psychology and applied Psychology Statistics. Throughout her career, she trained as a psychoanalyst in study groups on "Psychoanalytic Theory and Technique" at the Argentine Psychoanalytic Association (APA). She has taken more than 30 specialization courses in various pathologies, such as neurosis, psychosis, phobias, depression and anxiety attacks, under the guidance of prominent psychoanalysts such as M. Abadí, A. Rascovsky and Jamil Abuchaem.

In the field of transpersonal psychology, she specialized in Regression Therapy and Past Life Therapy, complementing her training with a postgraduate degree in Ericksonian Hypnosis, as well as studies in Shamanism and Shamanic Healing.

She is the author of the book Beyond Psychoanalysis and currently serves as President of the Argentine Association of Past Life Therapy.

In addition, it annually provides training courses in Regressive Therapy for health professionals, as well as postgraduate courses in Regressive Therapy for already trained therapists, in online mode, aimed at colleagues from all over the world.

Making a Strength from a Weakness - writing your way out of a past life.

Presentation: Thursday, may 29, 10:50am - 11:50am.
Meeting Room 1

Being afraid of answering phonecalls is generally considered a weakness. Some fault in your system that needs therapy. Yet, it happens so often with introvert persons, that I wonder if it's really a fault. Is it not mere a choice in ways of communication? Extraverts talk a lot, introverts tend to think first. Also, some people need to hear news or instructions, others need to read them to be able to remember.

Through written messages, we are able to pick up emotions and charged words. We simply read between the lines as well. Also, people use certain expressions. Through these, it is possible to detect one or even more past lives. In this lecture I will explain more about this and I will show you an example.

DURATION: 60 min

Willemijn's career path took many twists and turns. Right after high school, she started studying theology, but after two years she discovered that she would rather work with people than talk about God. She switched to psychology. There, she discovered that a scientific approach did not suit her. She wanted to help people in a practical way. She quit and started working as a typist. To still be able to move up the ladder, she took an evening study in Spanish teacher training and got a college degree. Then the evening study Psycho-social work, as a basis for working with people. And finally the School for Reincarnation Therapy Netherlands (SRN), from Rob Bontenbal. Since then, 2005, she has had clients in her home practice. In 2008 she joined Earth Association for Regression Therapy as a member. In 2019/2020 she became an active member of EARTH's Financial Committee. In 2021 she became Board member and in 2022 President.

Dancing with Regressive Chairs

Seminar: Thursday, May 29, 11:00 - 13:50h.
Meeting Room 2

In this workshop we will be dealing with the use of chairs and parts therapy to achieve a fast induction towards the past and to deal with the remaining process in a systematic way, making sure we bring the session to a sound therapeutic completion. The method gives us some hints for making sure about it. We will also consider the way we may use two or more chairs to deal with ancestors and their possible impact in our client's ongoing life. Again, a specific protocol will be discussed.

DURATION: 2 hr. 50 min.

Vitor Rodrigues, PhD in Psychology, has been working as a Psychotherapist since 1986 and as a Regression therapist since 1997. He is currently a teacher at Sofia University, USA, and taught educational and developmental psychology at Portuguese universities for 17 years.

He as a former President of EUROTAS, the European Transpersonal Association (2005-2009) and of Alubrat, the Portuguese-Brazilian Transpersonal Association, 2003-2009. He also coordinated the EUROTAS group for Certification and Accreditation in Transpersonal Psychotherapy, 2000-2012. Vitor works with Regression Therapy, Hypnosis, Breathwork, Meditation, Psychic Defence, and is used to teach courses, deliver workshops or lecture in many countries.

He is also the author of 17 books, namely social criticism, self-help manuals (7 of them), science-fiction, psychic defence and regression experiences.

The Experiences of the Soul in the Maternal Womb.

Presentation: Thursday, may 29, 12:00 - 12:50h.
Meeting Room 1

Throughout the twenty-one years that I have been conducting regressive therapy sessions, I have come across many cases in which the current suffering of the patient had its origin in his or her experiences in the womb and at birth.

In some of these cases I have found that the presence of lost souls from spontaneous or induced miscarriages can make the next pregnancy unviable due to the mother's lack of connection with the new being coming into the world. In my book 'Posesión Espiritual y Almas Perdidas' (Editorial Isthar, 2022) I wanted to include one such case and an extensive testimony from the consultant.

In the lecture I will present at this 5th International Symposium of Regressive Therapy, entitled 'The Experiences of the Soul in the Maternal Womb', I will talk about the physical and emotional consequences that intrauterine life and birth can have for people. I will also talk about the importance for parents, especially the mother, to be aware of the influence on their future children of the experiences they have in the womb and at birth.

My intention with this lecture is to continue to help future mothers and fathers to understand the importance of intrauterine life for the future development of that soul that has chosen them to develop a new experience of incarnation.

V INTERNATIONAL CONGRESS
REGRESSIVE THERAPY

Nacho
Romón

Spain - Psi.

Nacho Romón (Las Palmas de Gran Canaria, 1961) is a psychologist, economist, therapist and trainer of Regressive Therapy therapists, writer and international lecturer. During 2024 he has been a teacher of the II International Course of Advanced Training in Regressive Therapy, organised by Centro Atma of Cártama.

Nacho Romón has been conducting sessions of Regressive Therapy for twenty-one years. During those years he has conducted around 6,000 individual sessions. He has been giving courses and conferences on this regressive technique since 2005 and in the last nine years he has trained more than a hundred people as therapists.

After a successful career spanning twenty-five years in multinationals, in his own companies and as a senior manager in financial institutions, Nacho Romón definitively left his job as an economist to dedicate his life to his true vocation: to help other people.

He is the author of the book 'Posesión Espiritual y Almas Perdidas' (Editorial Isthar, 2022) and **co-author of the book** 'Terapia Regresiva y Consciencias no Humanas' (Editorial Círculo Rojo, 2024).

In the first of his books he includes a chapter about miscarriage, stillbirth and premature death, in which he presents a case about the experience of a mother in her second pregnancy after the death of her first child one day before the scheduled birth date.

¿What is the story behind birthmarks and/or birth defects? Dynamics involved in the development of their formation.”

Seminar: Thursday, may 29, 16:00 - 18:50h.

Meeting Room 2

There has always been a very big dilemma in the history of philosophy, does the body affect the spirit or is it the spirit that affects the body? Here, an opportunity will be given to review this matter with a fresh look. No one is ever going to look at things as they used to after this seminar is over. This provocative workshop will be a great challenge for both conventional and alternative therapists.

What are the objectives of the course:

- Therapists will first learn to use another bridging technique to drift into past-life regression.
- They will have an overview of the related literature and the mounting evidence concerning the formation of birth-marks and birth defects.
- They will learn on more aspects on how mind and body interact and how they are so strongly interwoven.

Questions that we will deal with.

Why is one person born with a birth defect when another -i.e. his twin brother- is not?

Why does a congenitally malformed person have the particular malformation he or she has and not some other one?

DURATION: 2hr. 50 min.

Athanasios Komianos

Grecia - Lic.

Nassos Komianos is a practicing hypnotherapist and certified regression therapist in Athens, Greece. He studied psychology and sociology in the USA. He ventured to discover the psyche which was nowhere to be found in his college years.

Disappointed by mainstream psychology he turned into hypnosis whereas he discovered that trance constituted the via regia in unlocking the soul's unravelled wonders.

He served as a Vice President 2009-2013 and President of the Earth Association for Regression therapy, EARTH (2014-2015) and is currently the editor in chief of the International Journal of Regression Therapy.

He is an author of two books, several articles and has conducted trainings and has given lectures in Germany, Portugal, Turkey, Estonia, USA, India, Russia and the Netherlands.

The Soul and Biological Survival Programs.

Presentation: Thursday, 29 May, 13:00 - 13:50h.

Meeting Room 1

What does the body represent to me? "The divine vessel where our soul has the capacity and ability to express itself on this physical plane through emotions, sensations and symptoms."

A few years ago, illness was treated as a malignant influence. Illness was investigated when physical symptoms appeared in a person and it was thought that something was attacking our body. Illness can be anything you want, however, from a biological point of view, for our body it is a Biological Survival Program (Dr. Hamer).

That's right, "illness" is our body's way of trying to fix what you stopped paying attention to when you stopped listening to it.

That which impacted you and you didn't know how to handle it. Those emotions that you decided to stop expressing. That which you believed. That lack of love for yourself.

The body does not get sick randomly or "break down" for no reason; in almost all cases, when a symptom breaks into a person's life, it is the result of the adaptation mechanism that their brain is putting in place to synchronize with the environment. And what role does the soul play in all this? Do you want to know? Don't miss this talk!

DURATION: 50 min

**V INTERNATIONAL CONGRESS
REGRESSIVE THERAPY**

I was born in Mexico City. I graduated as a Biological Pharmaceutical Chemist, specializing in Clinical Biochemistry at the National Autonomous University of Mexico (UNAM). I worked in the area of research into respiratory diseases (asthma, lung cancer, tuberculosis and other respiratory immunodeficiencies) and emigrated to Canada where I completed a diploma as an "Addiction and Community Services Worker" and "Social Support Worker" specializing in topics related to addictions and physically disabling diseases.

I arrived in Spain in 2009 and it was here that I listened to my inner self and began to study different energetic healing techniques. I have studied Active and Quantum Spiritual Healing Energy Therapies, Arolo I and II, Akashic Healing, Health Harmonization with Grabovoi, Akashic Records Mastery, Initial Kabbalah, Family Constellations, Mediumship, Telepathy with Animals, I trained as a Master Practitioner in NLP, Coaching with NLP and Ericksonian Hypnosis, I became certified in Biological Decoding.

Originally, I did a Master's in Clinical and Psychosomatic Hypnosis and I am an eternal student of Dr. Hamer's Biological Laws. It was in the world of hypnosis that I first heard the name of Dr. José Luis Cabouli and something inside me led me to study Past Life Therapy with him.

Member of AETR and AEPNL.

Co-author of one of the AETR books "Regressive Therapy and Non-Human Consciousness"

For the past year I have been part of the AETR board of directors as coordinator of the group of volunteer translators.

Spiritual Possession: A therapeutic approach from Shamanism and Regressive Therapy

Presentation: Thursday, May 29, 19:00 -19:50h
Meeting Room 1

Since ancient times, shamanism has recognized the existence of energies or entities that can influence a person's life. In many sessions, clients experience sensations and symptoms that "do not belong to them," or express that they have been told, in response to certain reactions: "you seem like a different person." Has this happened to you? This presentation will address how to identify and release these influences, combining regressive therapy and shamanism to restore balance and personal power. Experience in treating these cases will be shared, offering a deep insight into the healing process.

There will be time for questions at the end.

DURATION: 50 min.

Past Life Therapist - Shamanic Practitioner
Graduate of Michael Harner's three-year
Foundation of Shamanic Studies program. -
Disciple of Foster Perry, Golden
Hummingbird. - Initiated in Andean
Shamanism by masters from Peru - Initiated

Constellations and Regressions: Similarities and common resources
Aspects of regression therapy applicable to the field of constellations.

Presentation: Thursday, May 29 19:00 -19:50. Meeting Room 2

I want to show the complementarity of CONSTELLATIONS and REGRESSIONS in group workshops and consultations, the result of my experience over several years.

I will explain the similarities between regression therapy and constellations. The abundance of common resources applicable to enrich the other technique, increasing its effectiveness and complementing each other in a natural and fluid way.

The same objective and therapeutic field, where the resources of both methods are fused, leaves aside the purity of one of the techniques to make way for the art of accompanying the person's soul to carry out its work in a deep and effective way.

DURATION: 50 min

Beatriz is from Cádiz (Spain), a graduate in Psychopedagogy, a Special Education Teacher with more than thirty years of experience, Facilitator and trainer of Family, Systemic and Archetypal Constellations for more than ten years, Past Life Therapist -trained with José Luis Cabouli-, Brainspotting Therapist, LNT Therapist, Yuen Quantum Healing, Facilitator of Systemic Rituals on the Wheels of Life, Grief Accompaniment (DOL Program), Trained in Gestalt, Transpersonal Integrative Psychotherapy, SAT Program, Mindfulness, NLP, Astrology, Shamanism, Natal Script, Systemic Coaching, Life Integration Process, Systemic Health, Trauma and Presence, Healing of the Lonely Twin.

She accompanies people in group workshops integrating various disciplines and in personal growth groups. She teaches Constellations Training and Supervision.

He is a member of the Spanish Association of Regressive Therapy (AETR), the Spanish Association of Brainspotting, the Spanish Association of Gestalt Therapy (AETG) and a Teaching Member of the Spanish Association of Family and Systemic Constellations (AECFS).

Regression Therapy and Family Constellations. Discovering the incredible technique to constellate the family during a regression.

Presentation: Friday, May 30, 09:30 am. - 10:20 am.
Meeting Room 1

Family burdens are those that make us behave in ways we do not want, block us and make us repeat the mistakes of our parents or grandparents, as well as complicate our family relationships. All of them can be worked on with regressive therapy combined with the theoretical framework of family constellations, thus being able to understand and heal the original wound and the relationship with all the members of the family.

DURATION: 45 min

The Impact of Abuse on the Soul. Fragmentation and the veil of oblivion.

Presentation: Friday, may 30, 09:30am-10:20h.

Meeting Room 2

In this presentation we will explore the profound impact of abuse on the fragmentation of the soul and how these traumas can influence the consultant's adult life. During a traumatic experience, such as abuse, the soul can fragment as a protection mechanism, creating what is known as the veil of forgetfulness. This veil hides emotional pain and can manifest in adult life through symptoms such as obsessive-compulsive disorder (OCD) or repetitive patterns. Through regressions, we can access these moments of deep trauma, release repressed pain and restore the integrity of the soul. We will address how regression allows us to connect with the root of these hidden traumas and open the way to deep and conscious healing, restoring the emotional and energetic balance of the person. An invitation to discover how the soul's memory can be key to complete healing.

DURATION: 50 min

**V INTERNATIONAL CONGRESS
REGRESSIVE THERAPY**

I am Gina Rodriguez, and my journey of self-discovery began after going through a deep "dark night of the soul." It was a moment of personal crisis that prompted me to search for answers within myself and embark on a journey of transformation. After living in London for a decade and working and training in the fashion industry, I moved to Malaga, where I worked for 17 years in a multinational company in a management position. However, my soul continued to yearn for something deeper, something that would lead me to find balance and inner healing.

Five years ago I decided to train as a therapist in Regressive Therapy and Past Lives, obtaining my degree at the ATMA center under the guidance of Carlos González Delgado. This discipline allowed me to heal my own emotional wounds and, from there, I discovered my purpose: to help others overcome traumas and blockages.

Today I offer my regressive therapy services in Benalmádena and online. In addition, I am the co-author of three books based on literal transcriptions of therapy sessions with the personal testimonies of each client.

Finally, I would like to say that my greatest satisfaction is accompanying others on their own healing journey, helping them discover a fuller and happier life.

The Shadow in the Spotlight. Setting free the talents you keep in the shadow for the benefit of life today. Interactive activity. Partly lecture, most phenomenal teaching.

Seminar: Friday, may 30, 11:00 - 13:50h. Meeting Room 1

The presentation is built up from a theory and background part, to the immediate practical side. First part will be focused on the phenomenon of 'shadowwork' en the many aspects of the work ion regression therapy. There will be plenty examples and illustrations. After this, we will do a group-process and share our experiences. Possibly we can perform some interventions of a variety of techniques. Participants usually want to see the work in action. Presenter will perform an in depth session with a volunteering colleague. A handout will be made on the topic and given to those present on the day. Analysis and discussion of the work is a educational interactivity. We perform a energy closure at the end of the presentation.

DURATION: 3 hr

IBRT Certified member of EARTH. Professional member of AETR. Born in the Netherlands, multilingual teacher, therapist and trainer in Holographic Regression Therapy. Innovator in the field, founder of IPARRT practice and travelling teacher for TASSO international programs.

The value and healing power of Regression Therapy became a topic of study for me in the early 1990s. That time I had a practice in natural magnetism (pain relief). I studied Philosophy at Erasmus University Rotterdam. When I realized the huge missing link in human and healing sciences is understanding what Soul Power and Transpersonal intelligence can do for us, I joined to study with Hans ten Dam (Regression and Reincarnation therapy - graduated in 2000). Ever since I have been involved in 'solution focused' holographic regression and reincarnation therapy, now named Transpersonal Regression Therapy. For over twenty years I have been teaching in various schools in Europe, USA and India, presented at conferences and brought post graduate specialties for large groups of mainly TASSO students and graduates.

Co-author of 'Terapia Regresiva y Almas Perdidas' and 'Consciencias no humanas' by Spanish Association AETR. Author of articles in IJRT and TASSO Mail. Find recordings of Marion's innovations through EARTH Association. IPARRT Bali workshop specialties on request. Sufi Temple dynamic World Meditations in 2022 - recorded by Joining Hands India. Marion participated in the EARTH movie "Why regression therapy?"

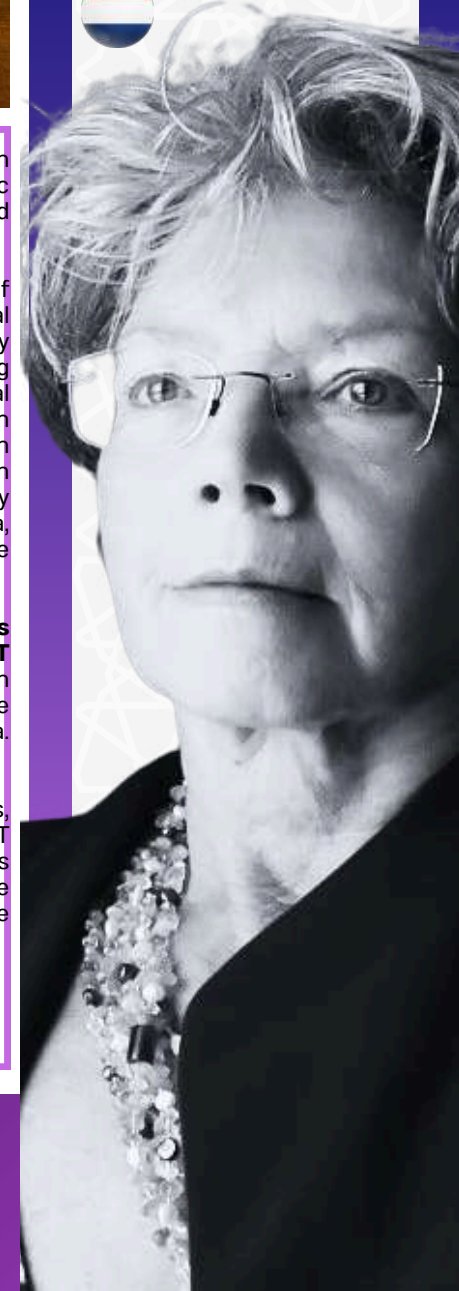

I am a co-founder of EARTH Association and the WCRT world congresses, where I present and bring trainings. Specialties developed in IPARRT practice ('the Amazing ART'), and coaching and counselling techniques designed in MENSICS® institute, reach many layers in society and are available for professionals only. Sharing is caring - it is a delight to share with you.

Unlocking our Genuine Sexuality by Healing the Abuse Trauma.

Seminar: Friday, may 30, 11:00-13:50h. Meeting Room 2

During childhood we are very sensitive - a small touch or caress at a given moment, made with an inappropriate intention, a word spoken more forcefully can be felt by the child as abuse. What is normal for one person may be perceived differently by another. We don't need to have strong physical or verbal violence, rape or other similar acts to consider an action as abuse. From my point of view, abuse means any violation of boundaries or entering the personal space without the consent of the person. The barometer is ultimately, how the victim perceived the act.

The abuse is enforced by the guilt and shame, leaving the victims with no choice than to close in order to protect the last resources. Usually the most affected parts of our being are our emotions and our sexuality. Later on, this blockage starts to manifest especially in intimate relationship - the abuse continues, sexual problems (like premature ejaculation, frigidity, the impossibility to have an orgasm), there can be problems in getting pregnant and making a commitment to start a family.

The workshop aims to explore the most significant abuse trauma you have had in this life and find out the cause, which may also be in a past life you had with that person who abused you.

The workshop will explore these wounds with gentleness and compassion, using Regression Therapy and Gestalt Therapy. Healing this unfortunate event releases unsuspected resources and reconnects us to the creative potential of our being.

During the practical part of the workshop we are going to use the following therapeutic techniques:

- Various Regression Therapy techniques.
- Gestalt Therapy - the phenomenological approach, the experiment.
- Working with the body - breathing, expressing feelings using the body (for example expressing anger by hitting a pillow), expressing trauma through body postures. The body techniques have the purpose to help with dissolving the blockages.
- Group imagery methods.

DURATION: 2hr 50 min.

Victor Chirea is a psychotherapist, specialized in Gestalt Therapy and a Certified Regressive Therapist, member of the Earth Association for Regressive Therapy. He is currently a member of the University Committee of EARTH, for 6 years he was one of the members of the Board of Directors and former President of EARTH. After graduating in Electronics and Telecommunications, he started his second specialization - Psychology. He continued his studies with a Master's degree in Clinical Psychology and Psychological Counseling and also graduated from the Department of Training of Teaching Personnel. Shortly after he published a book on Regressive Therapy: Fragmentation of the Soul. Consequences and the Reintegration of the Lost Parts.

His therapeutic approach is holistic, combining scientific information and research data with spiritual approaches. On his pilgrimages, he reached different spiritual centers in India and Tibet, where he had the privilege of meeting enlightened masters. He studied and practiced Buddhist meditation techniques guided by Master Tanpai Rinpoche Acharya. During his free time, he enjoys doing retreats in the mountains, painting, and teaching Ki-Aikido (as Sensei) for physical health and mental peace.

He is currently involved in his own private practice as a therapist and is also a trainer, preparing future regression therapists, at the Romanian Institute for Regression Therapy, which he founded in 2016.

Love and Loss.

Seminar: Friday, may 30, 16:00 - 18:50h.

Sala 1

The presentation begins by defining love as a deep emotional connection that shapes relationships, whether familial, romantic, or platonic. It examines the psychological and physiological effects of love on individuals. Our capacity to love is shaped by a rich tapestry of influences, from psychological elements such as attachment and self-esteem to biological factors like brain chemistry. Family, social, cultural, and environmental contexts also play crucial roles in shaping how we experience and express love. Life experiences, personal growth, and even our spiritual beliefs further refine and define how we give and receive love.

It also influences and reflects on how we suffer loss. Love's absence or the end of a relationship can lead to grief, emotional pain, and a sense of identity disruption. The stages of grief (denial, anger, bargaining, depression, and acceptance) are discussed, highlighting the emotional complexities individuals experience in the face of loss. There may be an impact of loss on mental health, and grief can affect not only emotional well-being but also physical health. Coping mechanisms are examined, such as seeking social support, engaging in self-care, and allowing oneself to grieve.

Finally, the presentation concludes with a message of resilience, emphasizing how love, even in its loss, can lead to personal growth and transformation. It encourages individuals to reflect on their experiences with love and loss to find healing and meaning. Ultimately, love is not a static trait but a dynamic, evolving capacity influenced by a variety of internal and external factors.

The presentation will include theory, discussion and a group demonstration.

DURATION: 1 Ó 2 hr

Psychiatrist - Degree in Medicine at the Faculty of Medicine of the University of Coimbra, Hospital Assistant of Psychiatry, Degree of Consultant in Hospital Medical Career. Psychotherapist - training in Systemic and Family Training and Intervention, specialization in Clinical Hypnosis and Brief Psychotherapy, and Regression Therapy and adopts a systemic and psychodynamic person-centered approach, using strategic interventions in modified states of consciousness.

Teaching experience in postgraduate courses for healthcare professionals in the field of Hypnosis and Modified States of Consciousness in clinical settings. Research in the field of psychotherapy with Modified States of Consciousness, as well as in the relationship between psychological factors and physical illness.

The destiny of souls - Shamanism -

Presentation: Friday, may 30, 16:00-18:50h.

Meeting Room 2

From the shamanic perspective and ancestral traditions, the soul undertakes a sacred journey after leaving the physical body. In this conference we will explore how ancient shamans guide this process of transition to the spiritual worlds, where the soul finds rest, wisdom and preparation for future incarnations. Through shamanic rituals and practices, this natural cycle of life, death and rebirth is honored, helping to reconnect with the spiritual essence and the mysteries of the afterlife according to the teachings of our ancestors.

Following the presentation, Foster will lead an online shamanic journey of exploration

DURATION: 2hr and 50 min

MODALITY: ON LINE

Foster Perry, a graduate of Georgetown University of the Arts, is a shaman and spiritual teacher. He is the creator of a transformative teaching modality: The Golden Hummingbird, with an approach that synthesizes the knowledge of ancestral native healing traditions from around the world.

“Regressive Therapy and Mediumship”.

Presentation: Friday, 30 May, 19:00 - 19:50h.

Meeting Room 1

Nowadays, mediumship is not only limited to communication with disembodied souls, but also includes connecting with the Spiritual Plane, that is, with our entire energetic or subtle being, with other energies and dimensional planes.

We have managed to get out of the historical period in which people who used it were set on fire and, just a few years ago, we have stopped being “locked up” and/or “pathologized”, recognizing it as an ability that we all have to some extent and can be developed.

Some of us are born with it, while others are “awakened” or recognize it at some point in their lives. The truth is that many people experience this ability as a burden; they don’t know what to do with it, it overwhelms them.

As Regression facilitators, we can turn it into a great tool, either for our personal development or to better accompany our clients and educate them so that they can experience it as a gift.

During this presentation I will share how I merge Mediumship and Regressive Therapy. Space for questions at the end of the presentation.

The Evolution of the Soul.

Presentation: Friday, may 30, 19:00-19:50h. **Meeting Room 2**

The evolutionary work that the incarnated soul has to do to raise its vibration and consciousness will be addressed. Considering that, at the soul level, there is no healing without consciousness and there is no elevation of consciousness that does not imply healing.

These are changing times. The rules of the game have changed. It is no longer worth staying awake and pretending to be asleep. The time to shine is now!

In this dimension, we often have to live with pain, but suffering is always optional. It is not about resigning ourselves, we have come to be happy. Now, more than ever, it is necessary to lighten our existential backpacks.

Regressive Therapy helps to heal the soul and, in doing so, allows us to live with much more peace and harmony.

Life is full of opportunities. Dharma and higher potentials are always aligned with the purpose that the soul brings to manifest in this existence.

Where do you choose to live? Do you choose fear or do you choose love?

Healing the Wounded Feminine.

Seminar: Saturday, 31 May, 11:00 - 13:50h.

Meeting Room 1

Introductory talk where I will present my vision and approach to Past Life Therapy and then focus on the Wounded Feminine.

I will then conduct a regression by drawing lots among the attendees.

DURATION: 3hrs

Doctor from the University of Buenos Aires (1974), trained as a surgeon.

In 1988 he abandoned the practice of surgery to dedicate himself exclusively to the practice of Past Life Therapy. Creator of the Cabouli method in Past Life Therapy, which is followed by training schools in Argentina, Chile, Spain and Mexico.

Since 1992 he has directed the Training Course in Past Life Therapy, having trained more than 500 therapists in Argentina, Canada, Spain, Mexico and Venezuela.

Author of the following books:

- Past Life Therapy
- The Journey of the Soul
- The Work of the Soul
- Life before Birth
- Spiritual Possession Therapy
- The Purpose of the Soul
- Soul Entrapment and Recovery,
- Past Life Messages (49-card deck + book)

Co-author:

- The Soul Without Veil
- Participation in the book The Medicine of Being, by María Carmen Martínez Tomás.

**Pavel
Gyngazov**

Russia - MD.

Pavel Gyngazov was born in 1947 in Tomsk, Russia. He graduated in medicine from the Tomsk Medical Institute in 1976. From 1976 to 1983 he worked as a gynecologist-obstetrician. Since 1983, after specializing in sexology, sexopathology and psychotherapy, he has been working as a sexologist in Tomsk.

Since 1993, he has been practicing regression therapy. Since 2001, he has been a member of the International American Association of Regression Therapists - IARRT.

He has been a speaker at six of the seven World Congresses. At each congress he held a seminar with a demonstration of the proposed technology. He made presentations in 2008 and 2013 at the annual summer meetings (annual convention) in Faro (Portugal) and Roosta (Estonia).

Three articles have been published in The Journal of Regression Therapy: The Harmonizing Effect of Regression Therapy, On the Question of the Concept of Karma According to Regression Therapy Data, Human and Nonhuman Incarnations in a Regression Therapy Session Using the Technique of Stopping Internal Dialogue.

In 2013, the first book "Roads of Lives" was published. In 2017, the second book "Circles of Completion" was published. Both in Russian and English.

In 2017, he was awarded the title of Honorary Member of EARTH.

Since 02.02.2022, the P.S. Gyngazov School "Research of Hidden Memory Resources" has been established, within the framework of which face-to-face and online seminars are regularly held both for Russian speakers and with translation into English.

Since 2022, she has been giving online webinars for EARTH members "Internal dialogue interruption technique in regression therapy".

Freeing Ourselves from Embedded Polarizations.

Seminar: Saturday, 31 May, 16:00 - 18:50h.
Meeting Room 1

Trauma causes polarization in beliefs, emotions, and bodily sensations. These beliefs are recorded in our physical bodies and aura energy, and can accompany us for several lifetimes.

We will experience your own past life regression using first free association to access significant and reactive polarizations. Then, using the verbal Gestalt approach, we will return to the cause. Healing, restructuring and energetic clearing techniques will be used to release the past so that you can live consciously and freely in your present life.

Our time together will be process-oriented. You will learn the method by using it to heal and liberate yourself. By helping yourself, you will then be able to use this method to help your clients.

DURATION: 3hr.

“ The body´s support relating to one´s life theme: about diseases and root healing”.

Seminar: Saturday, 31 May, 16:00 - 18:50h. Meeting Room 2

Our body has a supreme intelligence in its own. Especially adverse reactions like a disease may at first glance appear incomprehensible. On deeper levels however at one´s surprise there can appear a different picture. It may be linked to a stuck situation in life, it may involve traumatic happenings in early childhood or even before. As well it could be linked to so called epigenetic relations where energies are passed down from one´s ancestor lines.

In any case, being able to change viewpoints and “understand” the purpose from the body´s perspective opens up a new potential of mental and spiritual powers capable to influence change in the physical body. The understanding of the real causes to the development of a disease contains as well the seeds to understanding about its healing.

Martin´s lecture will present some quite different case studies of cancer patients. An impression on the respective applied toolset will be given as inspirations to experienced therapists to take them over. In addition, depending on the audience´s interests a life demo or a group meditation for all participants will be given.

DURATION: 3 hrs

Martin is working as a psycho-oncologist; his clients almost exclusively being cancer patients. His formal education is an MBA in management and psychology. In his early career Martin founded businesses supporting therapies in radiology, radiation and oncology. He was involved in clinical development at the time.

Now, since more than 10 years, Martin works full time as a therapist relying on regression therapy, energy work, system constellation, mental as well as shamanic approaches and other methods.

Martin facilitates his clients reaching deeper levels of their own consciousness inquiring and understanding underlying energies and movements that have led to a current situation. This includes ‘talking’ to organs and even cancer cells, which can yield amazing insights.

Can Parasitic Energies Drive You Crazy?.

Presentation: Saturday, 31 may, 20:00 - 20:50h.

Meeting Room 1

In my therapeutic practice, I have found that more than 70% of my patients have problems that are caused by the influence of external or attached energies, commonly called "lost souls." This significant figure reveals the importance of paying attention to this phenomenon within the framework of regressive therapy and suggests that these parasitic energies have a more widespread and profound impact than has traditionally been recognized.

The presentation will address how these attached energies influence the emotional, physical and psychological well-being of people, causing blockages, fears, anxieties, inexplicable pains and unwanted behaviors that often cannot be explained by the experiences lived by the patient in his present or conscious past. Through regressive therapy, it is possible to identify and release these influences, allowing the patient to recover his autonomy and energetic balance.

DURATION: 45 min

Soul Essence Psychology: Soul Design Reflections in Past Lives, Origin, Purpose, & Higher Self.

Presentation: Saturday, 31 May, 19:00 - 20:50h.

Meeting Room 2

Soul Essence Psychology requires a combined perspective of your "this life" experiences and Soul Design. Your unique Soul Design includes Past Lives, Soul Origin, and Life Purpose, all Guided by your distinctive Higher Self. Past Lives demonstrate our karma and dharma, progressing from one life to the next with our pre-birth script and free will choices. What karma did you agree to balance, combined with carrying forward prior life accomplishments?

Soul Origin indicates whether our soul's evolution occurred primarily on Earth, in the vast Celestial Realm, or Angelic Realm. The origin of our soul energy is evidenced through regression, which explains mind-body qualities and challenges today. Our purposeful intentions now illuminate why we're incarnate.

Dr. Backman's thirty years of guiding Past Life and Between Lives Soul Regression clients offers a unique window, revealing how Soul Design guides us in a life of purpose, perspective, and conscious connection with our Higher Self to evolve our Soul and Humanity's Soul.

LIVE ON LINE

DURATION: 2hours and 50 min

Featured on Coast to Coast AM and Gaia TV, Dr. Linda Backman is an expert teacher, regression therapist & licensed psychologist with 45 years of private practice experience, including 30 years of guiding Soul Regressions. Linda was trained by Soul Regression pioneer Dr. Michael Newton and they worked together training other therapists for three years. Linda has conducted 1000's of Past Life and Between Lives Soul Regressions in person and remotely.

Linda founded the RavenHeart Center & Training Institute in Boulder, CO in 1997 and teaches regularly worldwide.

Linda's books are Soul Design (2025), Souls on Earth, The Evolving Soul & Bringing Your Soul to Light.

She is an international expert in understanding how reincarnation plays a pivotal role in our personal growth and relationships.

Regressive Therapy and Responsible Parenting.

Presentation: Sunday, 01 Jun, 09:30am- 10:20am.
Meeting Room 1

We come from ancestral stories in which parenthood was not responsible: abused, neglected children, accidents, abandonment, injustice, violence, rejection, exclusion, humiliation, death... and countless stories in which the miracle of giving life was "used" in an unbalanced and counterproductive way.

This has generated multiple and enormous wounds in our transgenerational life, which have been transmitted from generation to generation, causing serious energy imbalances that are affecting people's mental, emotional and physical health.

If we want to help society heal and evolve, we must seek responsible fatherhood and motherhood. The key to healing is in the children, in these new generations. Since the relationship with mom and dad is the basis of our masculine and feminine energy and the integration between them, it will be very effective to work with fathers and mothers, so that they heal and do not "dump" their wounds and their transgenerational nature on future generations.

Regressive Therapy will allow us to do comprehensive work in healing, prevention and raising awareness in parents.

V INTERNATIONAL CONGRESS
REGRESSIVE THERAPY

Sonia Tapiador Coello, Graduated in Psychology from the Autonomous University of Barcelona in 2002.

She began her professional career in the field of Education, supporting neurodivergent children and their families.

In 2007 she founded: Educainfants Psychological Center. She runs the center and serves adults, adolescents, children and the elderly. She provides Group Therapy (children and adolescents), Family Therapy and Couples Therapy.

Her formative origins in Cognitive-Behavioral Therapy evolved towards a more Integrative and Emotion-Centered therapy, whose main work is Emotional Development and the Integration of Body-Emotions and Mind. She developed her own work methodology that brings her closer to Transpersonal Psychology. Over the years, she introduced new holistic/transpersonal tools, including: psychonumerology, associative/psychoprojective cards, therapeutic tarot, etc.

In 2021, she trained as a Regressive Therapy Therapist at the ATMA School (Málaga) with Professor Carlos González, president of the AETR and disciple of Dr. Cabouli. Since then, she has applied TR in her work with adults, children and adolescents. She is a member of the Spanish Association of Regressive Therapy and co-author of its first book: "El Alma sin Velo". She participates as a speaker in the AETR International Symposia of 2023 and 2024, presenting topics related to her experience and the application of the technique in children.

Author of the story "Take care of your energy, take care of your superpower", from Apuleyo Publishing House. A therapeutic story that combines psychological tools for personal/emotional and social development, energy work tools (chakras) and Regressive Therapy resources.

Develops training sessions on Regressive Therapy applied to children.

Multi-approach in Regressive Psychotherapy.

Seminar: Sunday, 01 Jun, 11:00 - 13:50h. **Meeting Room 1**

This is a summary of the meeting between two complementary worlds in Regressive Therapy. The Hispanic-American school based on the teachings of the Argentinean Doctor José Luis Cabouli, powerfully cathartic, with the European school based on the teachings of the Dutch Psychologist Hans Ten Dam, powerfully psychotherapeutic.

The experience during the years 2023 and 2024 of the I and II Advanced Training Course in Regressive Therapy has provided the speaker, as a consultant, teacher and organizer of the same, with an enormously broad vision that is reflected in his current way of working and teaching Regressive Psychotherapy.

DURATION: 3hrs

Psychologist from the University of Malaga (Spain). Member A011251 (Official College of Psychologists of Eastern Andalusia), Usui Shiki Ryoho Master (initiated by Master Guy Pierre Braekman, within The Reiki Alliance, (International Association of Reiki Masters). Soul Therapist (initiated by Avi Hay Abohav), Past Life Therapist (initiated by Dr. José Luis Cabouli). Director of several radio programs. Creator of the Atma Center of Cártama, dedicated to the practice and teaching of Regressive Therapy.

“Possibilities of regressive psychotherapy in helping women and couples with infertility. Frozen life. Embryonic regression therapy”.

Seminar: Sunday, 01 Jun, 11:00 - 13:50h. Meeting Room 2

In this workshop I will discuss the possibilities of regression therapy and other areas of psychotherapy to help women with infertility. According to research by the World Health Organization, one in five couples in developed countries cannot conceive in the natural cycle. Psychotherapeutic help is also needed for women who repeatedly resort to assisted reproductive technologies but are still unable to become pregnant for psychogenic, transgenerational and other non-medical reasons. We know that in these cases attachments are formed that occupy a large part of the energy of the living person. And this is one of the focuses of regression therapy. Another focus of attention is the cryopreserved embryo prepared for implantation in the uterus and its past life. Embryo cryopreservation is a relevant topic for regression therapy. Embryo cryopreservation: the path to death or to life?

In the workshop, I will spend time on the following topics:

What therapeutic approaches are available in working with women with infertility in case of ineffective ART (Assisted Reproductive Technology) intervention?

What can a regression therapist do? Help you move from death to life.

Work with the timeline and sequentially review difficult situations in the history of women and men, as well as their families and ancestors, past lives and experiences between lives.

A new approach to therapy is the frozen embryo and its past life. This is a discovery from my experience.

I will also discuss and demonstrate the use of the genogram, constellations and other projective techniques in the work of a regression therapist.

I will give examples from my practical experience, answer your questions, conduct group exercises and meditation, and do a demonstration session (time permitting and upon request).

See you at the seminar!

REGRESSIVE THERAPY**

**Marina
Bilobram**
Moscow- MD.

I am a doctor and psychotherapist with a PhD. I am a gynecologist and obstetrician by first training. For 10 years I worked in a maternity hospital with pregnant women. By further education I am a psychotherapist, family and perinatal psychologist, psychoanalyst since 2004. I am a practitioner and researcher in the area of the impact of pregnancy and birth experiences and birth scripts on a person's adult life, on their feelings, health and relationships within couples and families.

I have been practicing regression therapy in the context of the present life and perinatal period for many years (since 2003). My practice was enriched with new methods and techniques during my training at TASSO Rus (Hans ten Dam Institute for Regression Therapy) and TIVR (Trisha Cayetano Institute for Therapy of the Inner Child).

I combine the practices of regression therapy with techniques of emotional and image therapy, art therapy and constellations, which I learned from Bert Helinger.

I have been teaching systemic family and perinatal psychotherapy with elements of regressive therapy since 2006 at the Russian Institute of Psychotherapy.

I am a member of EARTH, **the author of several scientific and popular articles and two books:**

1. A practical guide for pregnant women on preparing for childbirth, behaviour during childbirth and the birth of the baby. This book is currently being translated into English.

2. A book about family and ancestral orders and rules for couple and family relationships.

Body and Soul: TVP in Physical Symptoms.

Seminar: Sunday, 01 jun, 16:00 - 18:50h. Sala 1

As a clinical physician with more than 40 years of experience, and trained in TVP 25 years ago, I have come to believe that THERE IS NO ILLNESS DETAILED FROM THE SOUL.

Indeed, I consider organic disease to be multi-causal. We cannot deny the influence of genetics, the environment, microorganisms... and much less deny that the emotional factor is a determining factor in its onset or exacerbation.

There are also symptoms and signs that manifest physically without actually constituting a pathology. These are usually a tangible manifestation of a conflict of the soul.

In this Seminar I will first present the path taken to complement Medicine with TVP.

I will then perform therapeutic regression on any participant who wants to participate in the draw to find the origin of their illness.

Duration: 3hrs

Viviana graduated as a doctor from the University of Concepción (Chile) in 1979, later specializing in Internal Medicine and Rheumatology. In 1998 she graduated in Clinical, Ericksonian and Family Hypnosis from the Institute of Psychiatry and Psychology in Santiago, Chile. During 1999 and 2000 she completed her specialization as a Regression Therapist in Buenos Aires, Argentina, with Dr. José Luis Cabouli.

Founder and current director of the Chilean Academy of Regressive Therapy (2015).

Founding partner and current president of the Chilean Association of Past Life Therapists, ACHTEVIP (2013).

Professor and speaker at international TVP events and courses since 2020.

Healing the Inner Children of Past Life Personalities: Unlocking Deeper Understanding and Karmic Transformation.

Seminar: Sunday, 01 Jun, 16:00 - 18:50h. **Meeting Room 2**

Join Timm Christophel for an in-depth workshop that explores a rarely addressed yet profoundly transformative aspect of past life regression therapy. This session emphasizes addressing the inner children of past-life personalities, creating a clear connection between lingering childhood wounds and full past life healing.

In many cases, traditional past life regressions only scratch the surface of true healing. By exploring a past-life personality's childhood, we uncover the emotional roots and formative events that have shaped karmic patterns in that life. By addressing these hidden layers, therapists can facilitate not only deeper healing, but also a more complete understanding of the karmic tapestry woven across lifetimes.

This workshop is ideal for experienced past life therapists familiar with regression who wish to expand their toolkit with advanced techniques centered on transpersonal inner child healing. What you will learn:

The role of inner-child healing in transpersonal regression therapy: Gain insight into how the unresolved childhood trauma of past-life personalities affects current-life behavior, emotional patterns and spiritual growth.

The Tasso approach versus other regression approaches: Explore how Tasso's comprehensive integration of mental, emotional, sensory and physical healing deepens traditional methods.

Case Studies and Live Demonstrations: Witness transformative examples from Timm's practice that illustrate the critical role of childhood regression in past-life therapy.

Practical Applications: Participate in a group regression to explore inner child dynamics and learn step-by-step techniques for guiding clients through similar processes.

Sharing and integration: Participate in a discussion to analyze shared experiences and integrate newfound understanding into your practice.

Timm Christophel is a Transformational Healing Guide and an expert in past-life regression and inner child healing, dedicated to helping individuals and therapists uncover and resolve the deep-seated patterns that shape their lives.

Originally trained in business consulting, Timm's path took a profound turn when he discovered transpersonal regression therapy. Under the mentorship of Hans TenDam at the Tasso Institute, he immersed himself in the study of past-life exploration, karmic healing, and the integration of childhood experiences—both from the present and previous lifetimes.

For years, Timm has been at the forefront of inner child healing within regression therapy, refining techniques that bridge past-life trauma with deep emotional resolution. His work is built on the principle that unresolved wounds are the key to transformation—and that true healing extends beyond personal growth into a greater calling.

In addition to training therapists, Timm offers The Journey to the Inner Child, an acclaimed 8-week online course that provides individuals and professionals with the tools to work with inner child dynamics and deep-rooted patterns. His approach blends classical regression therapy with innovative healing methodologies, empowering both clients and practitioners to unlock multi-lifetime healing and personal mastery.
